

Purification Functions

Installation Requirements

- 1) 1/2" Water Supply
- 2) 1/2" Waste Line
- 3) 110v AC Circuit/20amp

After being treated by our HF-RO600 Water Vending Machine, raw water from tap will become pure drinking water which meets the requirements of "Health & Safety and Function Evaluation Criteria for Drinking Water Conditioner – Reverse Osmosis Treated". When it connects with the main water and power supply, it can automatically produce quality drinking water. Customers can get water by inserting coins or using payment card (additional cost). It will provide customers with fresh, inexpensive, high quality water for 24 hours.
